JOB OPPORTUNITY

TENURE-TRACK FACULTY IN POPULATION HEALTH

POSITION SUMMARY:

The Center for State Health Policy (Center), within the Institute for Health, Health Care Policy and Aging Research, is recruiting one or more faculty members with advanced skills to develop and lead an interdependent program of research addressing critical population health and health equity questions. They will work in-residence at the Center and will be jointly appointed in a Rutgers tenure-granting school or department.

The faculty will contribute to the implementation, analysis, scientific impact, and sustainability of the New Jersey Population Health Cohort Study (NJHealth Study) and must have an established record of excellence in scholarship and the ability to develop and lead a program of independent, extramurally funded research.

SPECIFIC DUTIES:

The faculty will be active members of the NJHealth Study leadership team, leading and contributing to the preparation of manuscripts using study data for submission to peer reviewed journals.

They will lead and contribute to NIH and other grant proposals that support future rounds of study data collection and address research questions of high scientific and public health importance.

The faculty will contribute to translational research communication activities with study participants and community and policy stakeholders and participate in training, coaching, and professional development of staff, post-doctoral fellows, and others collaborating on the NJHealth Study.

Finally, they will engage with the educational and service missions of the IFH, Center, and their jointly-appointed department, including by providing mentorship and professional development support for staff, post-doctoral...
ALL ARE WELCOME!

Rutgers University values diversity of background and opinion and prohibits discrimination or harassment based on any legally protected class in all personnel policies and practices. Rutgers is a welcoming and supportive environment for all and an equal opportunity, affirmative action employer.

QUALIFICATIONS

Education:

- Doctoral degree in a relevant field such as social or mental health epidemiology, psychology, sociology, or health policy and services research.

Experience:

- At least one year of relevant post-doctoral experience.

- Training and experience in advanced analytic techniques applicable to longitudinal cohort studies.

- Excellent written and oral communication skills and ability to translate research findings and concepts to both academic and non-academic audiences.

- Record of successful peer-reviewed, high-impact publications, appropriate to academic rank, addressing population health and/or health equity.

- Record of leadership of, or contributions to, major successful peer-reviewed grant proposals to the NIH or other sponsors, appropriate to academic rank.

- Ability to develop and lead a program of independent extramurally funded research.
